Description

I have been managing HR Operations mainly Recruitment at Lahore Waste Management Company (LWMC). We get details of applied candidates from an online job portal and from there we have to do a lot of work manually. Checking age limits, domicile requirements, qualification requirements, calculating experiences, calling candidates, making evaluation sheets for panel members and collecting them from panel members and then keeping record of all the data of candidates, jobs, and related information in scattered files. There is no single system to keep track of all these things at a single platform and this is what we are building.

The system will be a C# windows forms application with SQL server database (which may be hosted as per organization requirements, in this way any one with internet access will have access to data remotely). Since I am the one who manages recruitment, I will be its primary user, which gives me a lot of advantage knowing which features are actually required. We are building the thing which is actually required and can be deployed, A Digital Recruitment Management which can automate the screening process, interviews management, panel evaluations and generating a wide range of business applications at a single platform.

Use Cases

Features or Modules	Use Case ID	Use Case Name	Interface Id
Positions Management	U1.1	Adding a Position	I1.1.1
	U1.2	Editing a Position	I1.1.1
	U1.3	Inactivating a Position	I1.1.1
	U1.4	Generate Report for a Position	I1.1.1
Manage Advertisements	U2.1	Initializing a new Advertisement for a Position	I2.1.1
	U2.2	Editing Details of an Advertisement	I2.1.1
	U2.3	InActivating an Advertisement	I2.1.1
	U2.4	Generate Report of an Advertisement	I2.1.1
Intelligent Screening	U3.1	Import Candidates for an Advertisement	I3.1.1, I3.1.2
	U3.2	Shortlist Candidates	I3.2.1
	U3.2.1	Generate Screening Summary for an Advertisement	I3.2.1
	U3.3	Calculate Experience	I3.2.1
Interviews Management	U4.1	Schedule Interview	I4.1.1, I4.1.2
	U4.2	Manage Interviewers	I4.1.1, I4.1.2
	U4.3	Assign Different Days to Candidates	I4.3.1
Candidates Management	U5.1.1	Manage Candidates	I5.1.1
	U5.1.2	Edit Candidates	I5.1.1
	U5.1.3	Generate Report of a Candidate	I5.1.1
	U5.2	Blacklist Candidates	I5.1.1

Features or Modules	Use Case ID	Use Case Name	Interface Id
	U5.2.1	Generate Report of Blacklisted Candidates	I5.1.1
Candidates Attendance	U6.1	Mark Attendance	I6.1.1, I6.1.2
Candidates Evaluation	U7.1	Interview Candidate	I7.1.1, I7.1.2

Features / Modules and Detailed Use Cases

F1 POSITIONS MANAGEMENT

U1.1 Adding a Position

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to add a new Position.
- **HR Management:** Wants to keep record of Positions in the Organization.
- **Requesting Department:** Wants to confirm the addition of Position and matches with their requirements.

Preconditions:

- **Recruiter** has been identified and authenticated.
- **The position** is approved by the Requesting **Department**, **Human Resource Management** and Competent Authorities.

Success Guarantees (Post Conditions): A new Position is created in the system.

Main Success Scenario:

1. The **Requesting Department** notifies the **Human Resource Management** about the need for a new Position.
2. The **Human Resource Management** completes the necessary approvals from the competent authorities.
3. The **Human Resource Management** gives a detailed description of Position to the **Recruiter**.
4. The **Recruiter** opens the Positions Management.
5. The **System** shows the list of available Positions in the system.
6. The **Recruiter** creates a new Position.
7. The **System** asks for the details of Position.
8. The **Recruiter** enters the details of Position and save.
9. The **System** creates a new Position.

Extensions (Alternative Flows):

- 9a) The Position of the same detail already exists in the System.
- The **System** refrains the **Recruiter** from creating the Position.
 - The **Recruiter** changes the details and tries again.

9b) The **Recruiter** forgets to add a necessary detail.

- The **System** will refrain the **Recruiter** from creating the Position.
- The **Recruiter** enters the complete details and tries again.

U1.2 Editing a Position

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to edit an existing Position.
- **HR Management:** Wants to keep record of updates in Positions in the Organization.
- **Requesting Department:** Wants to confirm that the Position description matches with their requirements.

Preconditions:

- **Recruiter** has been identified and authenticated.
- The changes in **Position** are approved by the Requesting **Department**, **Human Resource Management** and Competent Authorities.

Success Guarantees (Post Conditions): The necessary changes are made in Position's details as per the requirements.

Main Success Scenario:

1. The **Requesting Department** notifies the **Human Resource Management** about the need for changes in details in an existing Position.
2. The **Human Resource Management** completes the necessary approvals from the competent authorities.
3. The **Human Resource Management** gives a detailed description of Position to the **Recruiter**.
4. The **Recruiter** opens the Positions Management.
5. The **System** shows the list of available Positions in the system.
6. The **Recruiter** selects Edit against the desired Position.
7. The **System** asks for the new details of Position.
8. The **Recruiter** enters the details of Position and save.
9. The **System** creates a new Position.

Extensions (Alternative Flows):

8a) The **Recruiter** forgets to add a necessary detail.

- The **System** will refrain the **Recruiter** from saving the Position.

- The **Recruiter** enters the complete details and tries again.

U1.3 InActivating a Position

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to inactivate the Position from the system.
- **HR Management:** Wants to keep record of Positions in the Organization.

Preconditions:

- **Recruiter** has been identified and authenticated.
- The **Human Resource Management** has approval of removing the Position from the organization.

Success Guarantees (Post Conditions): The Positions are inactivated.

Main Success Scenario:

1. The **Requesting Department** notifies the **Human Resource Management** about the need for inactivating an existing Position.
2. The **Human Resource Management** completes the necessary approvals from the competent authorities.
3. The **Human Resource Management** gives a detailed description of Position to the **Recruiter**.
4. The **Recruiter** opens the Positions Management.
5. The **System** shows the list of available Positions in the system.
6. The **Recruiter** selects the desired position and InActivates it.
7. The **System** saves the position as deactivated.

U1.4 Generate Report for a Position

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to generate a report of the candidates who have applied for a certain position.
- **HR Management:** Wants a specific report related to Positions in the Organization.

Preconditions:

- **Recruiter** has been identified and authenticated.
- The **position** exists for which the report is to be generated which is needed by the **requested department**.
- **Recruiter** has a list of applied candidates for the Position's Advertisement from the **Job Portal**.

Success Guarantees (Post Conditions): The report containing data of the candidates is generated for a specific post.

Main Success Scenario (Basic Flow):

1. The **Human Resource Management** asks the **Recruiter** for the details of Applied Candidates of a specific post for a specific department.
2. The **Recruiter** opens Position Management
3. The **System** shows the list of **Positions**.
4. The **Recruiter** searches for the desired **Position**.
5. The **Recruiter** exports the desired details.
6. The **System** gives the details as spread or pdf as per requirement.

Extensions (Alternative Flows):

5a) The **Recruiter** does not find the desired **Position**.

- The **Recruiter** will tell the **Human Resource Management** that the post does not exist anymore.
- The **Human Resource Management** will look for the actual existing post and inform the **Recruiter**.
- The **Recruiter** enters the new post and tries again.

F2 Manage Advertisements

U2.1 INITIALIZING A NEW Advertisement FOR A POSITION

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to add a new job role in the system.
- **HR Management:** Wants the Advertisement to align with the approved criteria.

Preconditions:

- **Recruiter** is identified and authenticated.
- **Advertisement** has been approved by the Requesting **Department**, **HR Management** and competent authorities.
- **The position** is advertised by means of the Communication department.
- **Position** Description, Requirements and Criteria has been finalized.

Success Guarantee (Post Conditions): A new **Advertisement** has been initialized against a **Position** in the system.

Main Success Scenario (Basic Flow):

1. The **Requesting Department** notifies the **Human Resource Management** that they want to hire resources for a **Position**.
2. The necessary proceedings and approvals are completed.
3. The **Human Resource Management** provides the finalized details, requirements and criteria to **Recruiter**.
4. The **Recruiter** opens the **Positions Management**
5. The **System** shows the list of available Positions.
6. The **Recruiter** selects the desired Position.
7. The **System** shows the list of Previous **Advertisements** of that Position.
8. The **Recruiter** “Adds a new Advertisement”.
9. The **System** asks for details of **Advertisement**.
10. The **Recruiter** enters details of **Advertisement** and save.
11. The **System** saves the Advertisement against the **Position**.

Extensions (Alternative Flows):

- 6a) The Position does not exist in the system.
- The **Recruiter** opens the Position Module.

- The **System** shows the list of Positions.
- The **Recruiter** “Adds a New Position”.
- The **System** asks for the details of Position.
- The **Recruiter** adds the details of Position and save.
- The **System** saves the Position.
- The Recruiter continues the remaining steps “INITIALIZING A NEW Advertisement FOR A POSITION”.

10a) The Advertisement of the same detail already exists in the System.

- The **System** refrains the **Recruiter** from initializing the Advertisement.
- The **Recruiter** changes the details and tries again.

10b) The Recruiter forgets to add a necessary detail.

- The **System** will refrain the **Recruiter** from initializing the Advertisement.
- The **Recruiter** enters the complete details and tries again.

Frequency of Occurrence: Depending on the requirement of the organization to start a new Advertisement against a Position.

U2.2 Editing Details of an Advertisement

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to edit a job role in the system.
- **HR Management:** Wants to keep the record of Advertisements up to date.

Preconditions:

- **Recruiter** is identified and authenticated.
- **Advertisement** has been approved by the Requesting **Department**, **HR Management** and competent authorities.
- **The position** is advertised by means of the Communication department.
- **Position** Description, Requirements and Criteria has been finalized.

Success Guarantee (Post Conditions): A new **Advertisement** has been initialized against a **Position** in the system.

Main Success Scenario (Basic Flow):

1. Some changes are required in the Advertisement due to some unavoidable circumstances.
2. The **Human Resource Management** provides the finalized details, requirements and criteria to

Recruiter.

3. The **Recruiter** opens the **Positions Management**.
4. The **System** shows the list of available Positions.
5. The **Recruiter** selects the desired Position.
6. The **System** shows the list of Previous **Advertisements** of that Position.
7. The **Recruiter** “Edits an Advertisement”.
8. The **System** asks for details of **Advertisement**.
9. The **Recruiter** enters new details of **Advertisement** and saves.
10. The **System** saves the Advertisement against the **Position**.

Extensions (Alternative Flows):

- 6a) The Position does not exist in the system.
 - The **Recruiter** opens the Position Module.
 - The **System** shows the list of Positions.
 - The **Recruiter** “Adds New Positions”.
 - The **System** asks for the details of Position.
 - The **Recruiter** adds the details of Position and save.
 - The **System** saves the Position.
 - The Recruiter continues the remaining steps “INITIALIZING A NEW Advertisement FOR A POSITION”.
- 9a) The Advertisement of the same detail already exists in the System.
 - The **System** refrains the **Recruiter** from initializing the Advertisement.
 - The **Recruiter** changes the details and tries again.

Frequency of Occurrence: Depending on the requirement of the organization to edit details of an Advertisement against a Position.

U2.3 InActivating an Advertisement

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to inactivate a job role in the system.
- **HR Management:** Wants the Advertisement to be inactivated.

Preconditions:

- **Recruiter** is identified and authenticated.
- **Advertisement** has been approved by the Requesting **Department**, **HR Management** and competent authorities and is active.
- **The position** is advertised by means of the Communication department.
- **Position** Description, Requirements and Criteria has been finalized.

Success Guarantee (Post Conditions): The **Advertisement** has been inactivated against a **Position** in the system.

Main Success Scenario (Basic Flow):

1. An Advertisement is required to be inactivated because of some unavoidable circumstances.
2. The **Human Resource Management** provides the finalized details, requirements and criteria to **Recruiter**.
3. The **Recruiter** opens the **Positions Module** ; **Advertisements Module**.
4. The **System** shows the list of available Positions.
5. The **Recruiter** selects the desired Position.
6. The **System** shows the list of Previous **Advertisements** of that Position.
7. The **Recruiter** “InActivates an Advertisement”.
8. The **System** InActivates the Advertisement against the **Position**.

Frequency of Occurrence: Depending on the requirement of the organization to inactivate an existing Advertisement against a Position.

U2.4 Generate Report for an Advertisement

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to generate a report of the Advertisement.
- **HR Management:** Wants a specific report related to advertisements in the organization.

Preconditions:

- **Recruiter** has been identified and authenticated.
- The **position** exists for which the report is to be generated which is needed by the **requested department**.
- **Recruiter** has a list of applied candidates for the Position's Advertisement from the **Job Portal**.

Success Guarantees (Post Conditions): The report containing data of the candidates is generated for a specific post.

Main Success Scenario (Basic Flow):

1. The **Human Resource Management** asks the **Recruiter** for a specific business report regarding Advertisement.
2. The **Recruiter** opens Positions & Manage Advertisement.
3. The **System** shows the list of Advertisements against selected positions.
4. The **Recruiter** searches for the desired **Advertisement**.
5. The **System** shows the Details of the desired **Advertisement**.
6. The **Recruiter** exports the required report and presents it to the Human Resource Management.

F3 INTELLIGENT SCREENING

U3.1 IMPORTING CANDIDATES FOR An Advertisement

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to add the data of applied candidates for a Position's Advertisement in the System.
- **Human Resource Management:** Wants details of applied candidates against an Advertisement.

Preconditions:

- **Recruiter** is identified and authenticated.
- **Recruiter** has a list of applied candidates for the Position's Advertisement from the **Job Portal**.
- The **Position** should exist in the system.
- The **Advertisement** should exist in the system.

Success Guarantee (Post Conditions): The details of applied candidates of a specific Advertisement has been imported from a spreadsheet.

Main Success Scenario (Basic Flow):

1. The **Human Resource Management** asks the **Recruiter** for the details of Applied Candidates of an Advertisement of a Position.
2. The **Recruiter** opens Intelligent Screening Module & Import Candidates for an **Advertisement**.
3. The **System** shows the list of Existing **Advertisements**.
4. The **Recruiter** searches the desired **Advertisement**.
5. The **Recruiter** selects an Advertisement.
6. The **System** shows the Details of Advertisement.
7. The **Recruiter** selects the spreadsheet to Import.
8. The **System** imports the details of candidates and shows it.

Extensions (Alternative Flows):

8a) There is some problem in importing candidates.

- The **Recruiter** notifies the **System Administrator** about the issue.

U3.2 SHORTLIST CANDIDATES

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to filter out the most relevant candidates.
- **Human Resource Management:** Wants the details of most relevant candidates for a job role.

Preconditions:

- **Recruiter** is identified and authorized.
- The **Advertisement** exists in the **System**.

Success Guarantee (Post Conditions): The **System** gives the details of most relevant candidates for a drill.

Main Success Scenario (Basic Flow):

1. The **Human Resource Management** asks the **Recruiter** for the detail of top most relevant candidates applied for a specific Advertisement of a specific Position.
2. The **Recruiter** opens the Intelligent Screening & Screening Candidates.
3. The **System** shows a list of Advertisements available.
4. The **Recruiter** selects an Advertisement.
5. The **System** displays the list of most relevant candidates and allows the Recruiter to apply further filtering.
6. The **Recruiter** creates a list of Final shortlisted candidates for the **Advertisement** and save.
7. The **System** maintains the record of eligible candidates.
8. The **Recruiter** communicates the details with **Human Resource Management**.

U3.2.1 Generate Screening Summary for an Advertisement

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to generate a screening summary of the Advertisement.
- **HR Management:** Wants a specific summary related to Advertisement.
- **Requesting Department:** Wants to keep all valid data of Advertisements for a specific post so they may continue to shortlist the candidates based on merit.

Preconditions:

- **Recruiter** has been identified and authenticated.
- The **Advertisement** exists for which the summary is to be generated which is needed by the

requested department.

- **Recruiter** has a list of applied candidates for the Position's Advertisement from the **Job Portal**.

Success Guarantees (Post Conditions): The report containing data of the candidates is generated for a specific post.

Main Success Scenario (Basic Flow):

1. The **Human Resource Management** asks the **Recruiter** for generating a screening summary for an Advertisement of a specific post for a specific department.
2. The **Recruiter** opens Intelligent Screening Module & view an Advertisement for the specific position.
3. The **Recruiter** searches for the desired **Advertisement**.
4. The **Recruiter** selects the desired **Advertisement**.
5. The **System** shows the Details of the desired **Advertisement**.
6. The **Recruiter** generates the screening summary of the required Advertisement.
7. The **System** imports the summary and shows it.

Extensions (Alternative Flows):

5a) The **Recruiter** does not find the desired **Advertisement**.

- The **Recruiter** will tell the **Human Resource Management** that the Advertisement does not exist.
- The **Human Resource Management** will look for the actual existing Advertisement and inform the **Recruiter**.
- The **Recruiter** enters the actual Advertisement and tries again.

U3.3 Calculate Experience

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to calculate the experience of a candidate manually before selecting him for the interview.

Preconditions:

- **Recruiter** is identified and authorized.
- The candidate is physically present with their experience letters.

Main Success Scenario (Basic Flow):

1. The candidate appears in an Interview.

2. The **Human Resource Management** wants to manually verify the experiences of candidates from their experience letters before selecting him for the interview.
3. The **Recruiter** asks the candidates for his experience letters.
4. The **Recruiter** opens the Experience Calculator.
5. The **Recruiter** enters the details of the candidate's experiences.
6. The **System** calculates the total experience of the candidate and shows it.
7. The **Recruiter** lets the candidate appear in the interview.

F4 Interviews Management

U4.1 Schedule Interviews

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to assign different days to eligible candidates, and assign the interview committee.
- **Human Resource Management:** Wants to interview different candidates on different days.

Preconditions:

- **Recruiter** is identified and authorized.
- The Candidates are finalized for the Advertisement.
- The Interview days and Interview Committee is finalized by the **Human Resource Management**.

Main Success Scenario (Basic Flow):

1. The Human Resource Management communicates the Advertisement Interviews Days and Committee with the Recruiter.
2. The **Recruiter** opens Interview Management ; Schedule Interview.
3. The **System** shows a list of Currently Active Advertisements.
4. The **Recruiter** selects an Advertisement.
5. The System asks the Recruiter to add the desired number of days.
6. The **Recruiter** adds a day, selects dates and interview committee for that day.
7. The **Recruiter** repeats Step 6 for each day to be added.

Extensions (Alternative Flows):

- 6a) A member of the Interview Committee is not available in the system.
 - The **Recruiter** Adds the Interviewer in the system and then continues.

U4.2 Manage Interviewers

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to keep record of Interview Panel Members (Interviewers).

Preconditions:

- **Recruiter** is identified and authorized.

Main Success Scenario (Basic Flow):

1. The **Human Resource Management** communicates to the Recruiter with the details of the Interviewer.
2. The **Recruiter** opens Interviews Management ↵ Manage Interviewers.
3. The **System** shows the list of existing Interviewers.
4. The **Recruiter** Adds a new Interviewer / Deletes an existing Interviewer or edits an existing Interviewer's details.
5. The **System** saves the changes.

Extensions (Alternative Flows):

- 4a) The **Recruiter** forgets to add a necessary detail of an Interviewer.
- The **System** refrains the Recruiter from saving the changes or adding a new Interviewer.
 - The **Recruiter** adds the remaining details and continues.

U4.3 Assign Interview Days to Candidates**Scope:** Recruit Pro**Level:** User Goal**Primary Actor:** Recruiter**Stakeholders and Interests:**

- **Recruiter:** Wants to assign different days to candidates selected for a certain Advertisement.
- **Human Resource Management:** Wants to interview different candidates on different days.
- **Interviewers:** Wants details of the candidates to interview.

Preconditions:

- **Recruiter** is identified and authorized.
- The Interviews are scheduled.
- The Interview Committee and Interview dates are finalized.
- The candidates have been finalized for the Advertisement.

Main Success Scenario (Basic Flow):

1. The **Human Resource Management** asks the Recruiter to divide the finalized candidates for an Advertisement into different days.
2. The **Recruiter** opens the Interviews Management ↵ Assign Interview Days.
3. The **System** shows a list of currently existing Advertisements.
4. The **Recruiter** selects the desired Advertisement.
5. The **System** shows the list of finalized candidates for an Advertisement.

6. The **Recruiter** assigns different Interview days to candidates.

F5 Candidates Management

U5.1.1 Manage Candidates

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to view/edit details of a candidate.
- **Human Resource Management:** Wants to keep an accurate record of candidates.

Preconditions:

- **Recruiter** is identified and authorized.

Main Success Scenario (Basic Flow):

1. The **Human Resource Management** asks the **Recruiter** for details of a specific candidate.
2. The **Recruiter** opens the Candidate Management.
3. The **System** shows a list of all existing candidates.
4. The **Recruiter** searches the desired candidates and views, edits its profile.
5. The **Recruiter** can also add a candidate when needed.

U5.1.2 Edit Candidates

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to edit details of a candidate.
- **Human Resource Management:** Wants to keep an accurate record of candidates.

Preconditions:

- **Recruiter** is identified and authorized.

Main Success Scenario (Basic Flow):

1. The **Human Resource Management** asks the **Recruiter** for details of a specific candidate.
2. The **Recruiter** opens the Candidate Management.
3. The **System** shows a list of all existing candidates.
4. The **Recruiter** searches the desired candidates and views, edits its profile.

U5.1.3 Generate Report of a Candidate

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to generate a report of a candidate.
- **HR Management:** Wants details of a candidate.

Preconditions:

- **Recruiter** has been identified and authenticated.
- **Recruiter** has a list of applied candidates for the Position's Advertisement from the **Job Portal**.

Success Guarantees (Post Conditions): The report containing data of the candidate is generated for a specific post.

Main Success Scenario (Basic Flow):

1. The **Human Resource Management** asks the **Recruiter** to generate reports of Candidates who have applied for a specific post for a specific department.
2. The **Recruiter** searches for the desired candidate.
3. The **System** shows the Details of the desired **Candidate**.
4. The **Recruiter** imports spreadsheet of the Candidate.
5. The **System** shows the Details of the desired **Candidate**.

Extensions (Alternative Flows):

5a) The **Recruiter** does not find the desired **Candidate**.

- The **Recruiter** will tell the **Human Resource Management** that the **Candidate** does not exist.
- The **Human Resource Management** will look for the **Candidate** and inform the **Recruiter**.
- The **Recruiter** enters the new **Candidate** and tries again.

U5.2 Blacklist Candidate

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to keep record of blacklisted candidates so that he does not shortlist the candidate for any Advertisement.
- **Human Resource Management:** Wants to blacklist a candidate because of some specific reasons.

Preconditions:

- **Recruiter** is identified and authorized.

- The Human Resource Management has notified the **Recruiter** to blacklist a candidate.

Main Success Scenario (Basic Flow):

1. The **Human Resource Management** asks the **Recruiter** to blacklist a candidate for some reasons and never shortlist him for upcoming Advertisements of any position.
2. The **Recruiter** opens Candidate Management.
3. The **System** shows the list of all existing candidates.
4. The **Recruiter** searches the candidate and adds him/her to the blacklist.
5. The **System** adds the candidate to the blacklist.

U5.2.1 Generate Report of Blacklisted Candidates**Scope:** Recruit Pro**Level:** User Goal**Primary Actor:** Recruiter**Stakeholders and Interests:**

- **Recruiter:** Wants to generate a report of the blacklisted candidates.
- **HR Management:** Wants to keep the record of blacklisted candidates in the Organization.
- **Requesting Department:** Wants to keep all valid data of blacklisted applicants for a specific post so they may continue to shortlist the candidates based on merit.

Preconditions:

- **Recruiter** has been identified and authenticated.
- The **blacklisted candidate** exists for which the report is to be generated which is needed by the **requested department**.
- **Recruiter** has a list of **blacklisted** candidates for the Position's Advertisement from the **Job Portal**.

Success Guarantees (Post Conditions): The report containing data of the **blacklisted** candidate is generated for a specific post.

Main Success Scenario (Basic Flow):

1. The **Human Resource Management** asks the **Recruiter** to generate reports of blacklisted Candidates who have applied for a specific post for a specific department.
2. The **Recruiter** opens Intelligent Screening Module & Import blacklisted Candidates for the specific position.
3. The **System** shows the list of **Positions** for which candidates have applied.
4. The **Recruiter** searches for the desired **Position**.
5. The **Recruiter** selects the desired **Position**.

6. The **System** shows the Details of the desired **Position**.
7. The **Recruiter** searches for the desired blacklisted candidates.
8. The **System** shows the Details of the desired **blacklisted Candidates**.
9. The **Recruiter** imports spreadsheet of the blacklisted Candidates.
10. The **System** shows the Details of the desired blacklisted **Candidate**.

Extensions (Alternative Flows):

- 5a) The **Recruiter** does not find the desired blacklisted **Candidates**.
- The **Recruiter** will tell the **Human Resource Management** that the blacklisted **Candidates** do not exist.
 - The **Human Resource Management** will look for the blacklisted **Candidates** and inform the **Recruiter**.
 - The **Recruiter** enters the new blacklisted **Candidate** and tries again.

F6 Candidates Attendance

U6.1 Mark Attendance

Scope: Recruit Pro

Level: User Goal

Primary Actor: Recruiter

Stakeholders and Interests:

- **Recruiter:** Wants to mark attendance of the candidates who appeared on a specific day of a specific Advertisement.
- **Human Resource Management:** Wants to keep record of candidates appearing on a specific day of a specific Advertisement.

Preconditions:

Main Success Scenario (Basic Flow):

1. The **Human Resource Management** asks the Recruiter to mark the attendance of candidates appearing on a specific day of a specific Advertisement.
2. The **Recruiter** opens Candidates Attendance ; Mark Attendance.
3. The **System** asks the user to Select a Position and an Advertisement.
4. The **Recruiter** selects a Position and an Advertisement.
5. The **System** shows the list of Days of that Advertisement.
6. The **Recruiter** selects a Day.
7. The **System** shows the list of candidates whose interview has been scheduled on that day of an Advertisement.
8. The **Recruiter** marks the Attendance of candidates and saves.
9. The **System** saves the Attendance of candidates against the specific day of specific Advertisement.

F7 Candidates Evaluation

U7.1 Interview Candidate

Scope: Recruit Pro

Level: User Goal

Primary Actor: Interviewer

Stakeholders and Interests:

- **Interviewer:** Wants to mark the evaluation of a Candidate.
- **Human Resource Management:** Wants to keep record of remarks of interview committee for a specific candidate against a specific Advertisement.

Preconditions:

- The interviewer is identified and authenticated.
- The interviewer is a panel member on a specific day of a specific Advertisement.

Main Success Scenario (Basic Flow):

1. The **Interviewer** opens the Candidate Evaluation $\hookrightarrow$ Interview Candidate.
2. The **System** shows a list of Advertisements and days in which the **Interviewer** is a panel member.
3. The **Interviewer** selects the desired day of an Advertisement.
4. The **System** shows the list of candidates accordingly.
5. The **Recruiter** views the Profile of the candidate sitting in front, interviews the candidate and marks the evaluation accordingly and save.
6. The system saves the Interviewer Remarks.

Interfaces

I1.1.1 Adding a Position

Figure 1: Positions Management module

I2.1.1 Initializing a new Advertisement for a Position

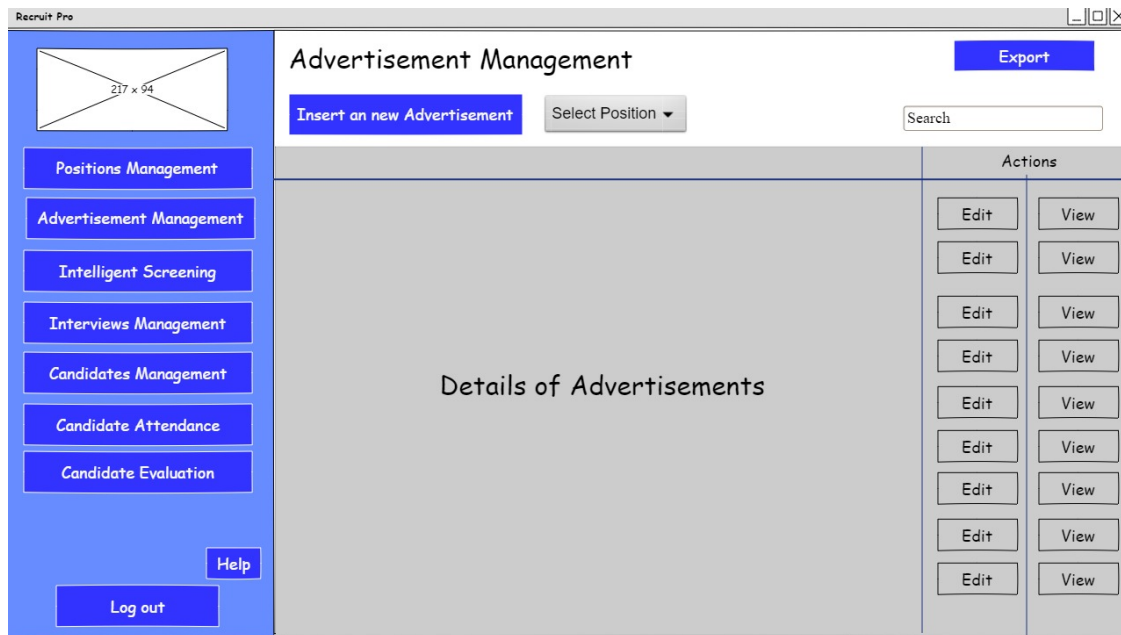

Figure 2: Advertisement Management module

Validators List:

- **Select Position Dropdown:** A valid position must be selected before inserting
- **Search Field:** Accepts text input
- **Insert New Advertisement Button:** Disabled if no position is selected

I3.1.1 Import Candidates for an Advertisement

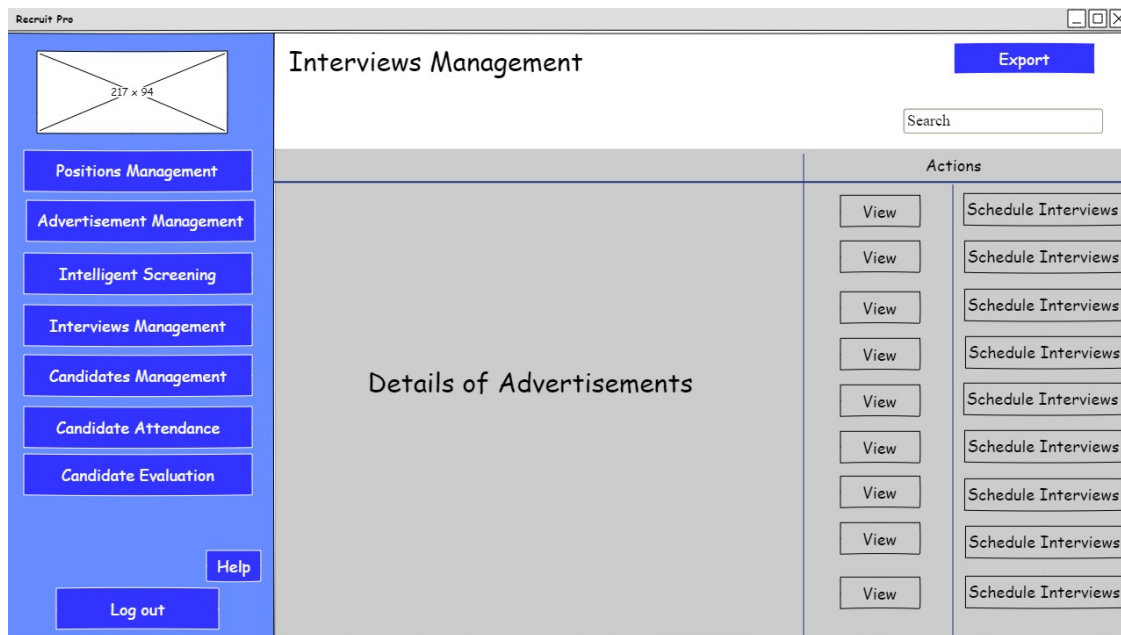

Figure 3: Intelligent Screening module

Validators List:

- **Advertisement Selection:** A valid advertisement must exist in the list
- **Search Field:** Accepts text input.
- **Import Candidates Button:** Only active when advertisement is selected
- **Shortlist Candidates Button:** Only active when advertisement is selected

I3.1.2 Import Candidates for an Advertisement

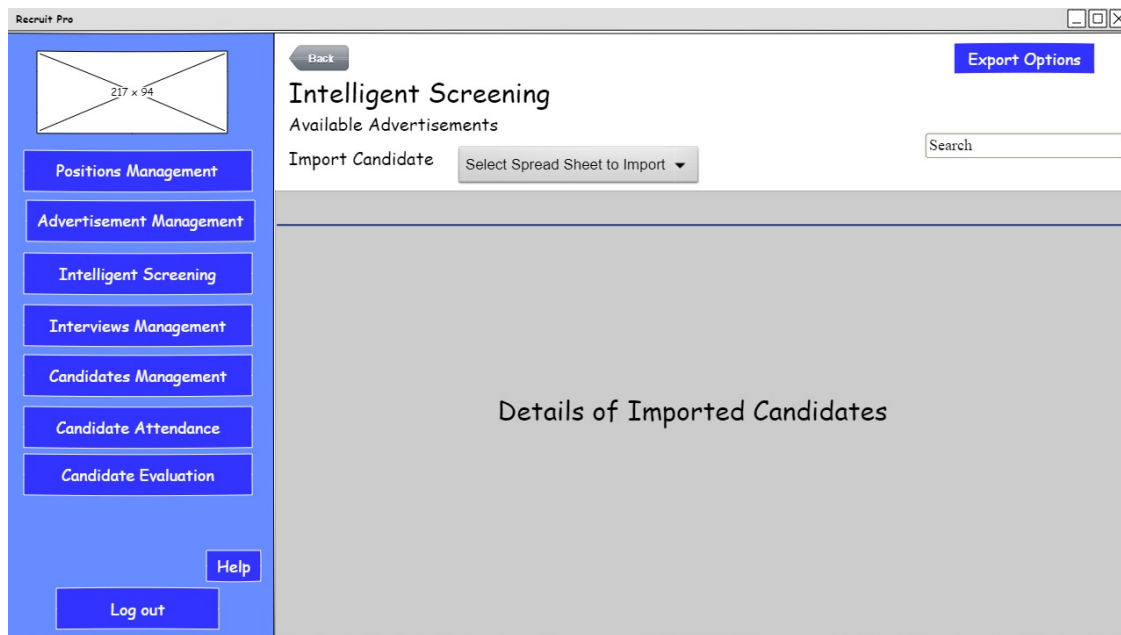

Figure 4: Import Candidates for an Advertisement submodule

Validators List:

- **Spreadsheet File:** Must be a valid Excel (.xlsx/.xls) file
- **Select Spread Sheet to Import Dropdown:** A file must be selected before importing

I3.2.1 Shortlist Candidates

The screenshot shows the 'Recruit Pro' application window. On the left is a sidebar with buttons for 'Positions Management', 'Advertisement Management', 'Intelligent Screening', 'Interviews Management', 'Candidates Management', 'Candidate Attendance', 'Candidate Evaluation', 'Help', and 'Log out'. The main area is titled 'Intelligent Screening' and includes a 'Back' button and an 'Export Options' button. Below the title are tabs for 'Shortlist Candidates', 'All Candidates', 'Eligible Candidates', and 'Not Eligible Candidates'. There are filters for 'Qualification', 'Age', 'Gender', 'Domicile', 'Experiences', and 'Experience Years', along with a 'Search' input field. The main content area displays 'Details of Candidates to be Shortlisted' and a table with columns for 'Profile', 'Eligibility', and 'Remarks'.

Profile	Eligibility	Remarks
View	Not Eligible ▼	
View	Eligible ▼	
View	Not Eligible ▼	
View	Eligible ▼	
View	Eligible ▼	

Figure 5: Shortlist Candidate submodule

Validators List:

- **Experience Years Filter:** Must be a valid numeric range
- **Eligibility Dropdown per Candidate:** Only “Eligible” or “Not Eligible” allowed
- **Remarks Field:** Optional; text input
- **Search Field:** Accepts text input

I4.1.1 Schedule Interview

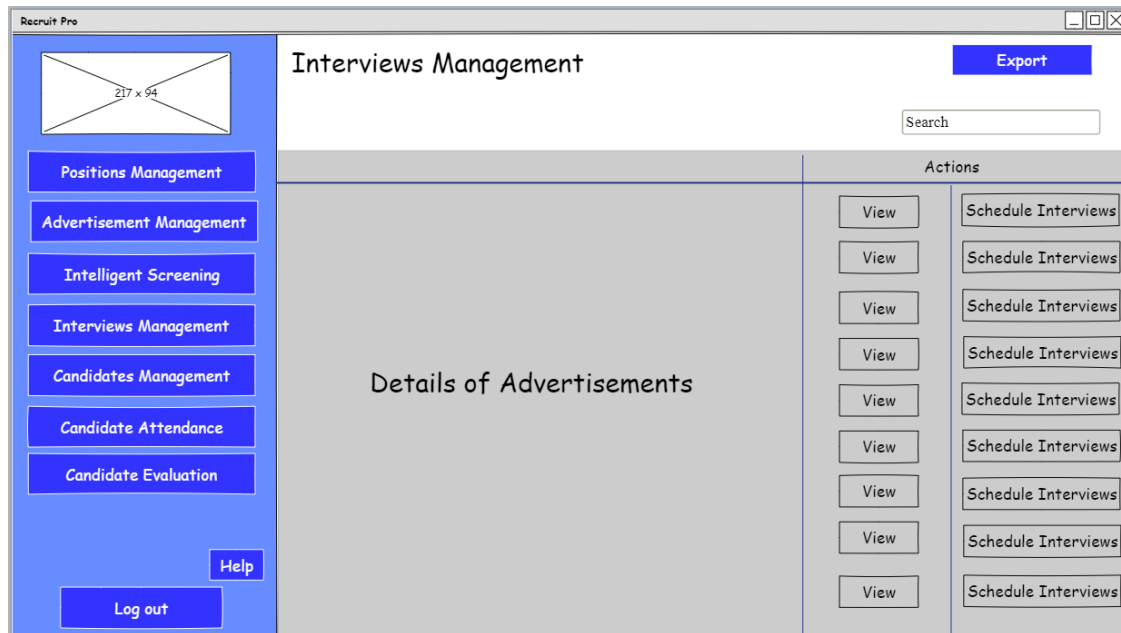

Figure 6: Interviews Management module

Validators List:

- **Search Field:** Accepts text input
- **Schedule Interviews Button:** Only active when an advertisement row is selected

I4.1.2 Schedule Interview

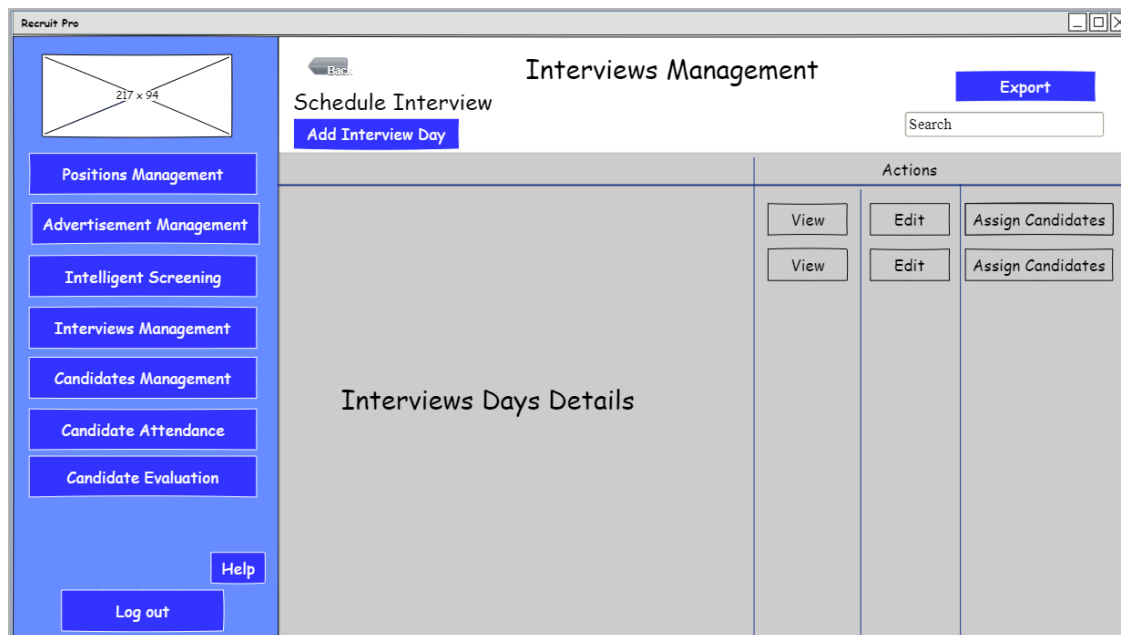

Figure 7: Schedule Interview submodule

Validators List:

- **Add Interview Day Button:** At least one day required before assigning candidates
- **Interview Day Date:** Must be a valid calendar date; cannot be in the past
- **Search Field:** Accepts text input; trims whitespace

I4.3.1 Assign Different Days to Candidates

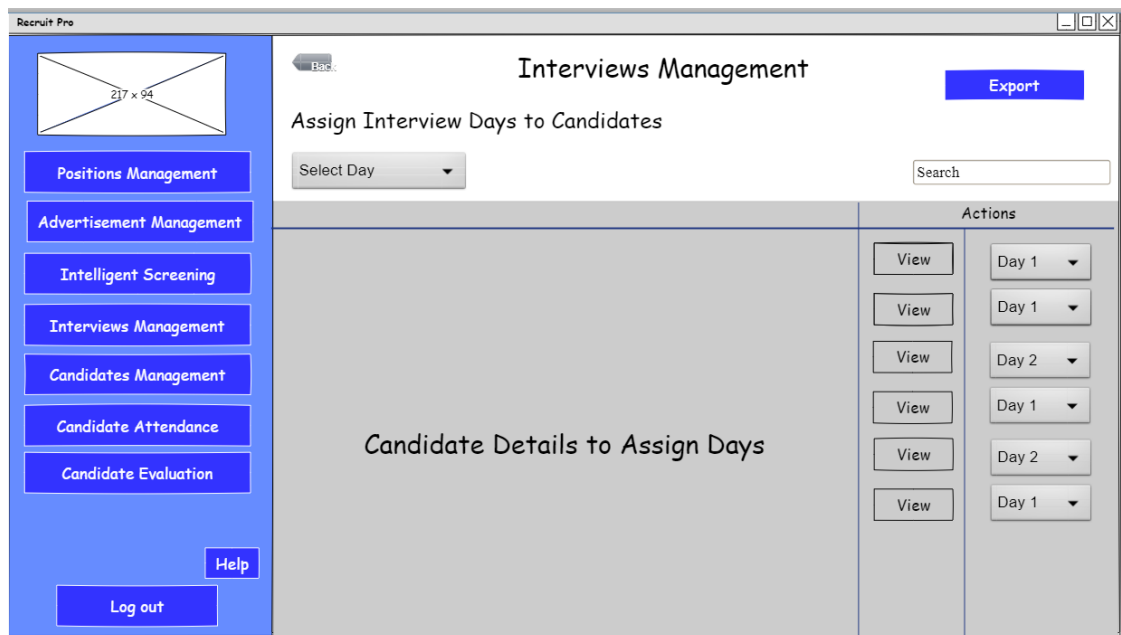

Figure 8: Assign Different Days to Candidates submodule

Validators List:

- **Day Assignment per Candidate:** Must select from available scheduled days (Day 1, Day 2, etc.)
- **Search Field:** Accepts text input
- **View Button:** Only enabled when a candidate row is selected

I5.1.1 Manage Candidates

Figure 9: Candidates Management module

Validators List:

- **Candidate Name:** Must not be empty; no special characters
- **CNIC:** Must be exactly 13 digits; numeric only
- **Insert New Candidates Button:** All mandatory fields must be filled before saving
- **Search Field:** Accepts text input

I6.1.1 Mark Attendance

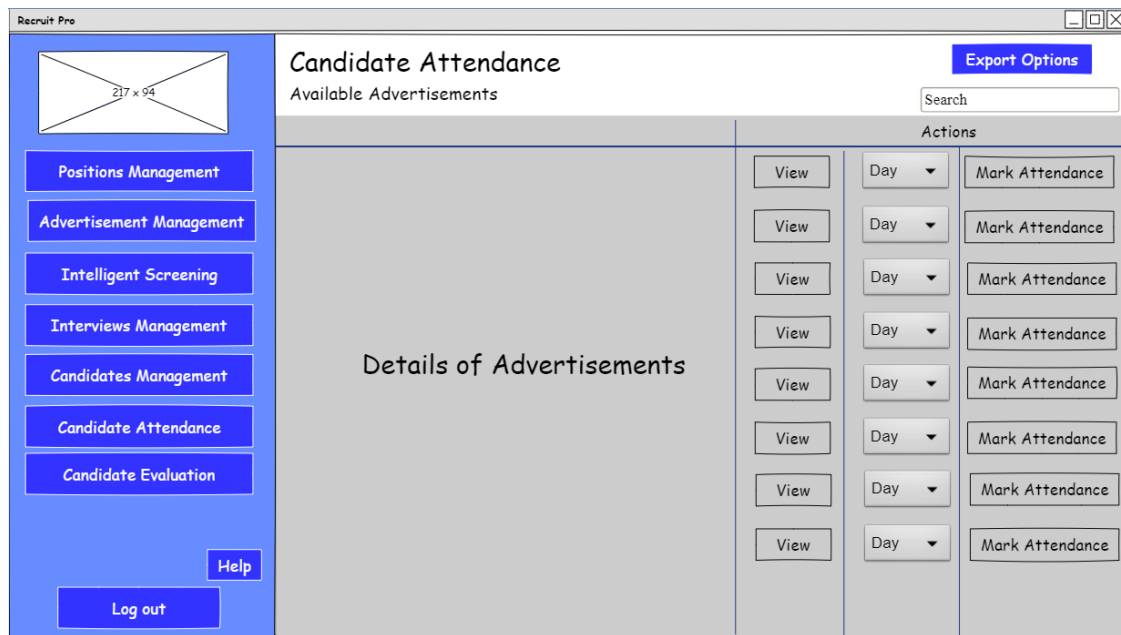

Figure 10: Candidate Attendance module

Validators List:

- **Day Dropdown:** A valid scheduled day must be selected before marking attendance
- **Search Field:** Accepts text input
- **Mark Attendance Button:** Only active when advertisement and day are selected

I6.1.2 Mark Attendance

The screenshot displays the 'Candidate Attendance' submodule in the Recruit Pro application. The interface is divided into three main sections:

- Sidebar (Left):** Contains navigation links for Positions Management, Advertisement Management, Intelligent Screening, Interviews Management, Candidates Management, Candidate Attendance (highlighted), and Candidate Evaluation. It also includes a Help button and a Log out button.
- Main Content Area:** Features a 'Mark Candidate Attendance' section with a search bar and an 'Export' button. Below this is a large grey area labeled 'Details of Candidates to Mark Attendance'.
- Table:** A table with two columns: 'Details of Candidates to Mark Attendance' and 'Actions'. The 'Actions' column contains a series of dropdown menus for marking attendance, with options 'Present' and 'Absent'.

Figure 11: Mark Attendance submodule

Validators List:

- **Attendance Status per Candidate:** Must select “Present” or “Absent” from dropdown

I7.1.1 Interview Candidate

Figure 12: Candidate Evaluation module

Validators List:

- **Search Field:** Accepts text input
- **Interview Candidates Button:** Only enabled when advertisement and day are selected

I7.1.2 Interview Candidate

The screenshot displays the 'Interview Candidates' submodule in the 'Recruit Pro' application. The interface includes a sidebar with navigation links: Positions Management, Advertisement Management, Intelligent Screening, Interviews Management, Candidates Management, Candidate Attendance, and Candidate Evaluation. The main area features a 'Mark Candidate Attendance' section with a search field and an 'Export' button. Below this is a table with columns for 'Remarks' and 'Comments'. The table contains several rows, each with a 'Remarks' dropdown menu (options: Recommended, Not Recommended, Nill) and a 'Comments' text input field. The text 'Details of Candidate to Interview' is visible in the main area.

Figure 13: Interview Candidate submodule

Validators List:

- **Remarks Dropdown per Candidate:** Must select from allowed values (Recommended, Not Recommended, Nill)
- **Comments Field:** Optional; free text; max 500 characters recommended
- **Search Field:** Accepts text input
- **Save Action:** Remarks must be set for all visible candidates before saving
